

# Geotechnical/Geoenvironmental Engineer Required – Northamptonshire

## Key Attributes:

- Minimum of 2 years proven experience in a ground investigation consultancy within the UK
- Working towards chartership with a BSc in Geology
- Self starter, team player with good inter-personal skills and proactive character

## Role Outline:

- Managing and supervising geotechnical and geoenvironmental investigations, undertaking fieldwork, soil and rock logging to Eurocode standards and supervising site contractors
- Good knowledge of UK design codes, standards, specifications, contamination legislation and soil waste guidance
- Delivering quality interpretative geotechnical and geoenvironmental technical reports on time and within budget
- A thorough understanding of characterising ground conditions and competent geotechnical design of foundations, basements, retaining walls, road pavements, ground improvement, earthworks, as well as mining and slope stability assessments and desk studies
- Excellent numerical and analytical skills. Conversant with GEO5 design software would be advantageous
- A full UK driver's licence is required for travelling to sites within the UK, and a valid CSCS card would be advantageous

## We can offer:

- Competitive salary
- Car allowance
- Private health care
- Non contributory pension
- Profit share scheme

To apply for the role please send your CV to [info@listersgeotechnics.co.uk](mailto:info@listersgeotechnics.co.uk) or alternatively call Ian Evetts on 01327 860060 to discuss the role or further Geotechnical opportunities in greater detail.
